

The Fourth Conference:

A Reflection Forum on Population and Poverty in Africa

The Union For African Population Studies (UAPS), in partnership with The National Board of the Family and Population (ONFP) and with the support of UNFPA and other institutions is organizing, in Tunisia from 8 to 12 December 2003, the Fourth African Population Conference on the theme «Population and Poverty in Africa : Facing the 21st century challenges»

The organization of this fourth conference on African population stems from UAPS willingness to set the conditions for a common reflection on the individual, collective and political strategies to implement in order to cope with the challenges posed by the diptych "Population and poverty in Africa".

In this respect, the major innovation at this conference of a mature UAPS will consist in offering the scientific community the opportunity for experts on African population to share ideas with top level decision-makers and leaders on the reciprocal implications of poverty and population growth, phenomena that are central among the challenges of twenty-first century Africa.

Scientific programme

The International Organization Committee (IOC) has identified topics for the Sessions as well as the organizers. Twenty themes around poverty were selected to be divided into formal sessions, informal sessions and round tables.

Formal Sessions

Session 1 – Data Collection, Theories, Methodologies Of Population And Poverty (African Development Bank – ADB)
