Centre for the Study of AIDS

The Centre for the Study of AIDS (CSA) is located at the University of Pretoria. It is a 'stand alone' centre which is responsible for the development and co-ordination of a comprehensive University-wide response to AIDS. The Centre operates in collaboration with the Deans of all Faculties and through Inter-faculty committees to ensure that a professional understanding of the epidemic is developed through curriculum innovation as well as through extensive research.

Support for students and staff is provided through peer-based education and counselling, through support groups and through training in HIV/AIDS in the workplace. A large number of student volunteers are involved in the programme, as are many community groups, ASOs and NGOs.

To create a climate of debate and critique, the Centre publishes widely and hosts AIDS Forums and seminars. It has created web- and email-based debate and discussion forums and seeks to find new, innovative, creative and effective ways to address HIV/AIDS in South African society.
